WestWorld of Scottsdale, North Hall

Meeting Room 1 located outside of the
Main Entrance

16601 North Pima Road,
Scottsdale, AZ 85260

These courses will examine the feasibility in which one utilizing a customized/complex mobility and seating system allows the end user to return to work or leisure activity involving air travel and transportation. Within the wheelchair service delivery model, there is a key step in our duty to educate properly on equipment maintenance and use as to prepare our end users for management of their mobility device throughout the lifetime of the equipment. Many times specific attention is paid to education and wheelchair management within the home as dictated by funding sources but we know that consumers utilize their complex rehab equipment to interact with a variety of environments for performance of various tasks including that of leisure participation and being able to properly and safely transport their customized equipment.

Empowering Participation: Mobility Device Air Travel Considerations (0.1CEU/1.0CEC/1hr)

Friday, September 6, 2024 - 10:00 AM

0.1 AOTA CEUs/1.0 Contact Hours

Learning Objectives:

At the conclusion of the course the participant will be able to:

1. Describe the significance of 3 air travel challenges specific to consumers who utilize a wheelchair as a primary means of mobility
2. Describe 2 equipment handling policies and procedures related to medical device management including power mobility devices.
3. Identify 2 backrest options that allow for power wheelchair adjustments to accommodate different cargo hold heights to prevent chair damage.
4. List 3 options for clients to protect and manage their equipment and utilize certain positioning devices during travel.

Quantum Rehab/Pride Mobility Products Corporation is an AOTA Approved Provider of professional development. Course approval ID# 399. This live course is offered at 0.1 CEUs (Beginner, OT Service Delivery).
