# Juditta

 Innovation  
In Motion

## Evolution in comfort & seating concept

*for reduction of pressure points*

Introducing the Juditta, a tilting and reclining wheelchair specially designed and built for adults, older teenagers and elderly patients who need an extended or permanent stay in a wheelchair or bed.

Juditta is the alternative to being bedridden. It is a sitting system that is recommended for individuals with many different levels of disability. It can even adapt to the most complex cases. It allows the user to assume a stable and comfortable position and prevents incorrect or pathologic attitudes. It is perfect for patients who need to maintain the laying position for long periods of time.

# DONDOLINO

## Emotions in motion

The Birillo is a walker for children with disabilities that is designed to allow autonomous movement while in the sitting position. Its peculiar shape and bright colors characterize the self-extinguishing upholstery, make it a fun and stimulating aid as well as a valuable tool for rehabilitation activities.

## Stability in motion

Dondolino is a prone standing frame designed and built by Ormesa to help children acquire an independent standing position. Dondolino's use in everyday contexts encourages environmental interaction by facilitating upper limb and head mobility and the development of individual motor skills.

# MINI STANDY

## Daily stability support

The Mini Standy is a stabilizing standing frame for children and teens that need support to maintain an upright standing position. It contains without forcing, allowing the individual freedom.

multisensorial  
stander

## A new concept in standing

The App Multisensorial Stander is a vertical stander designed to make therapy more enjoyable and engaging. It includes a patented electronics device mounted under the platform to transfer audio and visual signals into vibrations, allowing the child to experience a gratifying multisensory stimuli.

# multifunction Table

## Perfect stability for everyone

The Multifunction Table was designed for training and work activities as well as a complement to chairs and/or baby chairs. It provides a wide table top to exercise manual activities, allowing the user to stabilize their trunk and use their upper limbs freely.

# STANDY<sup>®</sup>

## A smart-stander for well-being

The Standy is a standing frame for adults and teens with various levels of ability and autonomy that is able to ensure excellent verticalization. It is safe, versatile and easy to adjust, and provides comfort in every situation. Accessories enable the Standy to be customized to the individual needs of the user.

# NOVUS

# DYNAMICO

## Maximum seating comfort

Novus is a stroller for children and teens with postural needs. It is available in three sizes. With a large list of interchangeable components, Novus can adapt to a wide variety of situations.

## Designed for your comfort

Dynamico by Ormesa is a gait trainer for adults and children that is ideal for both outdoor and indoor use. It can comfortably accommodate people with mild or moderate physical disability. With a wide range of accessories, the Dynamico is highly adaptable.
